7 Winter Car Prep Tips

Winter car prep is essential to get ready for the harsh conditions ahead. In particular, the charging and starting system, headlights, tires and windshield wipers all need to be ready for winter. To make sure your vehicle is prepared for the months ahead, take some time to perform the following maintenance tasks.

- 1. Clean any corrosion from battery posts and cable connections.**
- 2. Have any engine problems corrected at a repair shop.**
- 3. Replace worn windshield-wiper blades and remember to carry an ice scraper.**
- 4. Inspect all lightbulbs and replace burned-out bulbs. Clean road grime or clouding from all lenses.**
- 5. Have the exhaust system checked for leaks, and look for holes in the trunk and floorboards.**
- 6. Examine tires for wear and tear, and check the pressures once a month or before a long trip.**
- 7. Make sure your car is stocked properly; warm blankets and gloves, a flashlight, a car cell phone charger, snacks and an ice scraper are all good to have in case of a roadside emergency.**

TrueCore's Share Draft Account Renamed "Checking Account"

Share draft accounts at credit unions have always been the equivalent of personal checking accounts at banks. Likewise, share drafts are the equivalent of bank checks. Shares represent partial ownership in a credit union, and credit union members (shareholders) write drafts (checks) as a way to access the value of their partial ownership (shares).

TrueCore realizes that most of our members are more familiar with the term "checking account", so you may notice us phasing out the term "share draft" on your statement, receipts, online/mobile banking screens, and other related documents. Rest assured that only the name has changed and nothing else associated with your account itself.
